

The product team wants to focus on products that create maximum business impact.							
Task:							
Perform a multi-dimensional analysis using Sales, Profit, and Quantity to identify priority products.							
Answer:							
Multi-dimensional analysis identifies products that drive maximum business impact. High-profit and high-sales items should be prioritized.							
(Refer Sheet 7)							
Task 8: Executive Dashboard Creation							
Business Need:							
The CEO wants a single view dashboard that summarizes key insights.							
Task:							
Create an interactive dashboard combining at least three visualizations and apply filters such as Region or Category.							
Answer:							
An interactive dashboard consolidates key insights and allows filtering by region and category for decision-making.							
(Refer Sheet 8)							
Q9. Chart Selection Justification							
Explain why different charts were used for different business questions in this analysis.							
Answer:							
Bar Chart → Best for category comparison							
Line Chart → Shows trends over time							
Pie Chart → Displays contribution/share							
Scatter Plot → Identifies relationships (Sales vs Profit)							
Heatmap → Compares multiple dimensions							
Each chart is selected based on the nature of the data and the business question.							
Q10. Business Insight Summary							
Summarize two key insights from your dashboard and explain how they can help management make better decisions.							
Answer:							
Some high-sales orders generate low or negative profit, indicating pricing or cost inefficiencies. Management should review discount strategies.							
Sales show fluctuating trends over time, suggesting seasonality. This can help optimize inventory and marketing strategies.
